DETAILED ACTION

Claims 1, 3-11 are pending in this application. Newly added claim 11, amended claims 1, 3 are noted.

The amendment dated 11/21/05 has been entered and carefully considered. The examiner appreciates the amendments to the specification and claims. In view of said amendment, the objections, the 112 rejection, and the previous art rejection have been withdrawn.

Election/Restrictions

Applicant's election of claims 1, 3-11 in the reply filed on 11/21/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim 2 has been withdrawn from consideration as being directed to a nonelected invention.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 3-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al. (6,379,743). Lee discloses a method for the preparing an organic electroluminescent device having a transparent substrate, a transparent electrode layer, a metallic electrode layer, and an organic interlayer by vapor deposition polymerization (col.1 lines 10-30). An oxide layer and a

Art Unit: 1762

metal layer can be formed (col.3 lines 7-20). Specifically, the metal layer can be formed by vapor deposition (col.17 lines 46-49). A residual gas analyzer is utilized in a feedback process (col.17 lines 50-53). The gas composition and the substrate temperature can be changed (col.19 lines 39-45 and col.21 lines 17-19). However, the reference remains silent on purging between steps.

It is well known in vapor deposition to purge utilizing inert gases for the expressed purposed of reducing contamination. Hence, it would have been obvious to utilize a purge gas with the expectation of obtaining a higher quality film.

The limitations of claims 3-11 have been addressed above.

Memarian et al. (6,743,488) has been cited as relevant art.

Response to Arguments

Applicant's arguments with respect to claims 1, 3-11 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 1762

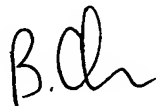

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
